

Integrated quality and environmental policy

The integrated quality and environmental policy of the Autostrada Wielkopolska II S.A. results from care for the highest standard and reliability of services provided, customer satisfaction and conscious concern for the environment. We strive to be an enterprise operating in full harmony with the environment, adhering to the principle of sustainable development.

Autostrada Wielkopolska II S.A. is a special-purpose joint-stock company that was established to perform the construction and operation of the 106-kilometer Świecko - Nowy Tomyśl western section of the A2 toll motorway in accordance with the concession granted. This section is an integral part of the Motorway of Freedom linking the Republic of Poland to the Trans-European Transport Network (TEN-T), one of the key links between Western and Central Europe and a strategic transport corridor for Poland on the Warsaw-Berlin line. Connecting the Republic of Poland to the network of Western European motorways, it forms the key element of the largest infrastructure project in Poland's concession structure and system.

Our mission is to provide a fast and safe road link connecting Poland with Western Europe, enabling the economic development of local and regional communities. Our Company's overarching goal is to provide the highest quality motorway services to our users while respecting the environment and surroundings.

We accomplish this mission by meeting the following quality and environmental goals:

1. Take up activities to ensure traffic safety
2. Ensure high quality road infrastructure
3. Ensure optimum motorway throughput while observing traffic safety rules and compliance with traffic regulations
4. Increase driver satisfaction by improving travel quality
5. Strengthen relations with the environment and implement initiatives that contribute to qualitative, economic and social development.
6. Reduce the negative impact of the motorway on the environment and prevent pollution
7. Shape pro-environmental attitudes in the organization and society

As part of the implementation of the integrated quality and environmental policy, the Company's management guarantees:

- the availability of resources necessary to improve the Integrated Management System
- meeting quality requirements and complying with environmental protection requirements
- shaping the belief that each employee is responsible for and has an influence on the operation of the Integrated Management System.

We consider continuous improvement of the effectiveness of the Integrated Management System (IMS) as the priority. Our IMS Policy is clear, implemented and maintained at all levels of the organization and is publicly available to stakeholders.

We actively promote and systematically provide environmental information to employees, inspiring them to take pro-environmental measures. We also involve our suppliers and business partners in our initiatives, creating a consistent and integrated approach to environmental responsibility.
